We are haunted by UFOs. They drift in and out of our

Free Reading Time Loops Precognition Retrocausation And The Unconscious

culture in movies and on television, on billboards and in books. They are everywhere. However, for one small community, they are much more than the fodder of science fiction storytelling - they alter the entire fabric of reality. Part narrative journey and part cultural study, *The UFO People* is a challenge to the UFO subculture and the broader public to recognize that UFOs, and the people who study them, challenge societal norms, institutions, and the many ideologies we assume to be true. This book tells the stories of UFO witnesses and experiencers of the paranormal, and ties in interviews and research of some of the most famous and infamous names in the UFO subculture. With critical questions that touch on history, gender, race, culture and philosophy, this book questions the very nature of UFOs and the people who study them. It delves into the reality that the UFO phenomenon, real or not, abandons us to a ghostly realm where nothing should be taken for granted. Take a journey into a curious culture and meet individuals who have been forever changed by the impossible. Meet the UFO people.

A fascinating first-hand account of an awakening into a psychic consciousness, paired with a revolutionary analysis by a respected professor of religion When Elizabeth Greenfield Krohn got out of her car with her two young sons in the parking lot of her synagogue on a late afternoon in September 1988, she couldn't have anticipated she would within seconds be struck by lightning and have a near-death experience. She

Free Reading Time Loops Precognition Retrocausation And The Unconscious

felt herself transported to a garden and engaging in a revelatory conversation with a spiritual being. When she recovered, her most fundamental understandings of what the world is and how it works had been completely transformed. She was "changed in a flash," suddenly able to interact with those who had died and have prescient dreams predicting news events. She came to believe that some early traumatic and abusive experiences had played a part in preparing her for this experience. Told in matter-of-fact language, the first half of this book is the story of Krohn's journey, and the second is an interpretation and analysis by respected professor of religion Jeffrey J. Kripal. He places Krohn's experience in the context of religious traditions and proposes the groundbreaking idea that we are shaping our own experiences in the future by how we engage with near-death experiences in the present. Changed in a Flash is not about proving a story, but about carving out space for serious discussion of this phenomenon.

Classic Haiku

American photographer Shannon Taggart (born 1977) became aware of spiritualism as a teenager when her cousin received a message from a medium that revealed details about her grandfather's death. In 2001, while working as a photojournalist, she began photographing where that message was received--Lily Dale, New York, home to the world's largest spiritualist community, proceeding to other communities in, for example, Arthur Findlay College in the UK. Taggart expected to spend one summer

Free Reading Time Loops Precognition Retrocausation And The Unconscious

figuring out the tricks of the spiritualist trade. Instead, spiritualism's mysterious processes, earnest practitioners and neglected photographic history became an inspiration. Her project evolved into an 18-year journey that has taken her around the world in search of "ectoplasm"-- the elusive substance that is said to be both spiritual and material. With *Séance*, Taggart offers a series of haunting photographs exploring spiritualist practices in the US, England and Europe. Supported with a commentary on her experiences, a foreword by Dan Aykroyd, creator of *Ghostbusters* and fourth-generation spiritualist, and illustrated essays from Andreas Fischer and Tony Oursler, *Séance* examines spiritualism's relationship with human celebrity and its connections with technology, and concludes with the debate over ectoplasm and how spiritualism can move forward in the 21st century.

The Mandate of Heaven

A guide to creating miracles in your own life through the power of thought • Offers a concise, clear formula of focused exercises and concrete tools to lay out a specific path to manifest your deepest desires • Presents the first serious reconsideration of New Thought philosophy since the death of William James in 1910 • Draws on the work of New Thought pioneers such as Ralph Waldo Emerson, Napoleon Hill, Neville Goddard, William James, Andrew Jackson Davis, Wallace D. Wattles, and many others Following in the footsteps of a little-known group of esoteric seekers from the late-nineteenth century who called

Free Reading Time Loops Precognition Retrocausation And The Unconscious

themselves “the Miracle Club,” Mitch Horowitz shows that the spiritual “wish fulfillment” practices known as the Law of Attraction, Positive Thinking, “the Secret,” and the Science of Getting Rich actually work.

Weaving these ideas together into a concise, clear formula, with real-life examples of success, he reveals how your thoughts can impact reality and make things happen. In this “manual for miracles,” Horowitz explains how we each possess a creative agency to determine and reshape our lives. He shows how thinking in a directed, highly focused, and emotively charged manner expands our capacity to perceive and transform events and allows us to surpass ordinary boundaries of time and physical space.

Building on Neville Goddard’s view that the human imagination is God the Creator and Ralph Waldo Emerson’s techniques for attaining personal power, he explores the highest uses of mind-power metaphysics and explains what works and what doesn’t, illuminating why and how events bend to our thoughts. He encourages readers to experiment and find themselves “at the helm of infinite possibilities.”

Laying out a specific path to manifest your deepest desires, from wealth and love to happiness and security, Horowitz provides focused exercises and concrete tools for change and looks at ways to get more out of prayer, affirmation, and visualization. He also provides the first serious reconsideration of New Thought philosophy since the death of William James in 1910. He includes crucial insights and effective methods from the movement’s leaders such as Ralph Waldo Emerson, Napoleon Hill, Neville Goddard, William James, Andrew Jackson Davis, Wallace D. Wattles, and many others. Defining a miracle as

Free Reading Time Loops Precognition Retrocausation And The Unconscious

“circumstances or events that surpass all conventional or natural expectation,” the author invites you to join him in pursuing miracles and achieve power over your own life.

Topological Geometrodynamics

Disease is a social issue, not just a medical issue. Using examples of specific legends and rumors, *The Kiss of Death* explores the beliefs and practices that permeate notions of contagion and contamination. Author Andrea Kitta offers new insight into the nature of vernacular conceptions of health and sickness and how medical and scientific institutions can use cultural literacy to better meet their communities' needs. Using ethnographic, media, and narrative analysis, this book explores the vernacular explanatory models used in decisions concerning contagion to better understand the real fears, risks, concerns, and doubts of the public. Kitta explores immigration and patient zero, zombies and vampires, Slender Man, HPV, and the kiss of death legend, as well as systematic racism, homophobia, and misogyny in North American culture, to examine the nature of contagion and contamination. Conversations about health and risk cannot take place without considering positionality and intersectionality. In *The Kiss of Death*, Kitta isolates areas that require better communication and greater cultural sensitivity in the handling of infectious disease, public health, and other health-related disciplines and industries.

Create an authentic path of Witchcraft that works for you. How does a modern Witch embrace tradition while navigating a complex contemporary life? How can you remain true to your own authenticity when you're surrounded by a whole world of magical theories, practices, deities, and paths? Weave the Liminal explores what it means to truly be a Witch in the modern world. Through the accessible lens of Modern Traditional Witchcraft, Laura Tempest Zakroff helps you formulate a personalized Witchcraft practice and deepen your work with spirits, ancestors, familiars, and the energies of the liminal realm. This book is a guide to connecting to your deepest feelings and intuitions about your roots, your sense of time, the sources of your inspiration, and the environments in which you live. It supports your experience of spellcrafting and ritual, and teaches you about metaphysical topics like working with lunar correspondences and creating sacred space. Discover valuable insights into practical issues such as teachers, covens, oaths, and doing business as a Witch. Modern Traditional Witchcraft is a path of self-discovery through experience. Let Weave the Liminal be your guide and companion as you explore the Craft and continue evolving the rich pattern of your magical life. Praise: "Laura Tempest Zakroff has made Witchcraft accessible to beginners in a way that changes generations. You'll be recommending this book for decades to come."—Amy Blackthorn, author of Blackthorn's Botanical Magic

The Source and Significance of Coincidences

Anomalous cognition involves the acquisition of information emerging from a distant point in spacetime that is blocked from the usual sensory systems by distance, shielding or time. From 1975 to 1995, Edwin May was a scientist and then program director for the U.S. government's psychic espionage program, known as STAR GATE. With the closing of that program, research has continued at the Laboratories for Fundamental Research, in Palo Alto, in the areas of methodology and analysis, neurophysiological studies, personnel assessment and selection, operations research, the physics of anomalous cognition, and psychokinesis. The conclusions from this 35+ year research effort can be summarized as (1) ESP exists; (2) the gradient of Shannon entropy is the key factor influencing information transfer; (3) because of the innate nature of the ability, the phenomenon so far resists training for excellence (and replication studies will not yield results), and (4) evidence for psychokinesis (PK) is questionable. This book presents the state-of-the-art, with 26 key papers on research methods, physiological research, decision augmentation theory, entropy, other research, and research challenges.

Secret Body

This landmark study explores the principles that allow the future to affect the present, and the present to affect the past, without causing paradox. It also

Free Reading Time Loops Precognition Retrocausation And The Unconscious

deconstructs the powerful taboos that, for centuries, have kept mainstream science from taking phenomena like retrocausation and precognition seriously.

The God Helmet Experiments

Does the Future Already Exist? Are the Distinctions Between the Past Present and Future Illusions as claimed by Einstein? Is it possible to travel into the future through the power of mind? Memory enables us to travel into the past, but mental time travel allows one to visit a future; a future which may already exist as predicted by Einstein's field equations: time may be a circle leading from the present to the future and then the past. Relativity also predicts that the only way to travel to the past is to first travel to the future, at which point one contracts to a size smaller than a Plank length and in so doing blowing a hole through the fabric of the space-time continuum and which may lead to a mirror universe if one dares to cross over the Einstein-Rosen bridge--and similar bridges are predicted to lead to other universes upon entering and surviving a journey through a black hole. Quantum mechanics also predicts time reversal in spaces smaller than a Plank length. Although the branch of quantum physics known as the many worlds interpretation rejects a central role for the collapse of the wave function by conscious observation and the act of measurements, the implications remain that there is no universal now and more than one past, present, or future, some more probable than others. The many worlds

Free Reading Time Loops Precognition Retrocausation And The Unconscious

interpretation also resolves issues related to possible paradoxes of time travel, such as changing the past, which just becomes one past among many. As explained in this volume, Einstein's relativity not only predicts that there is no universal now but that the future and the past and the experience of time are also relative to an observer."

Dark Cognition

Topological geometrodynamics (TGD) is a modification of the theory of general relativity inspired by the problems related to the definition of inertial and gravitational energies in the earlier hypotheses. TGD is also a generalization of super string models. TGD brings forth an elegant theoretical projection of reality and builds upon the work by renowned scientists (Wheeler, Feynman, Penrose, Einstein, Josephson to name a few). In TGD, Physical space-time planes are visualized as four-dimensional surfaces in a certain 8-dimensional space (H). The choice of H is fixed by symmetries of standard model and leads to a geometric mapping of known classical fields and elementary particle numbers. TGD differs from Einstein's geometrodynamics in the way space-time planes or 'sheets' are lumped together. Extending the theory based on fusing number concepts implies a further generalisation of the space-time concept allowing the identification of space-time correlates of cognition and intentionality. Additionally, zero energy ontology forces an extension of quantum measurement theory to a theory of consciousness and a hierarchy of phases is identified. Dark matter is

Free Reading Time Loops Precognition Retrocausation And The Unconscious

thus predicted with far reaching implications for the understanding of consciousness and living systems. Therefore, it sets a solid foundation for modeling our universe in geometric terms. Topological Geometro-dynamics: An Overview explains basic and advanced concepts about TGD. The book covers introductory information and classical TGD concepts before delving into twistor-space theory, particle physics, infinite-dimensional spinor geometry, generalized number theory, Planck constants, and the applications of TGD theory in research. The book is a valuable guide to TDG theory for researchers and advanced graduates in theoretical physics and cosmology.

This latest work by the renowned historian of religions Jeffrey Kripal crystallizes his twenty-five years of work on two aspects of the contemporary study of religion: the erotic expression of mystical experience and the rise of the paranormal in American culture. Combining elements of memoir, manifesto, and anthology (a Kripal Reader, as it were), Secret Body reveals Kripal's oeuvre not as a series of disconnected books but as a

Free Reading Time Loops Precognition Retrocausation And The Unconscious

dynamic corpus with the potential to renew and reshape the study of religion. Kripal explains how this oeuvre came about with his trademark humor and honesty, answers his censors and critics, and lays the foundation for a future theory of religion grounded in the cosmic nature of consciousness as such. No one interested in the history of religion and the erotic dimension of mysticism can afford to overlook Kripal's latest, his definitive intellectual self-portrait.

Sigil Witchery

Charles Richet, the distinguished French physiologist who won a Nobel Prize for his work on anaphylaxis, was a renaissance man. In addition to physiology he wrote poetry and plays and took an interest in many topics including pacifism, eugenics, philosophy and psychical research, which he referred to as metapsychics - the subject of this book.

The Selection Effect

The Mandate of Heaven was originally given to King Wen in the 11th century BC. King Wen is credited with founding the Zhou dynasty after he received the Mandate from Heaven to attack and overthrow the Shang dynasty. King Wen is also credited with creating the ancient oracle known as the Yijing or Book of Changes. This book validates King Wen's association with the Changes. It uncovers in the Changes a record of a total solar eclipse that was witnessed at King Wen's capital of Feng by his son King Wu, shortly after King Wen had died (before he

Free Reading Time Loops Precognition Retrocausation And The Unconscious

had a chance to launch the full invasion). The sense of this eclipse as an actual event has been overlooked for three millennia. It provides an account of the events surrounding the conquest of the Shang and founding of the Zhou dynasty that has never been told. It shows how the earliest layer of the Book of Changes (the Zhouyi) has preserved a hidden history of the Conquest.

The Flip

The Selection Effect explores a personal training process that allows one's consciousness to influence real-world physical events in ways that cannot be attributed to brain activity alone. Backed by rigorous data, it describes findings that challenge our current thinking about consciousness, the mind, and the nature of reality. The more we come to understand ourselves, the more we can change our fundamental relationship to the world in ways beneficial to our species.

Shannon Taggart: Séance

"Account of how comic book heroes have helped their creators and fans alike explore and express a wealth of paranormal experiences ignored by mainstream science. Delving deeply into the work of major figures in the field--from Jack Kirby's cosmic superhero sagas and Philip K. Dick's futuristic head-trips to Alan Moore's sex magic and Whitley Strieber's communion with visitors--Kripal shows how creators turned to science fiction to convey the reality of the

Free Reading Time Loops Precognition Retrocausation And The Unconscious

inexplicable and the paranormal they experienced in their lives. Expanded consciousness found its language in the metaphors of sci-fi--incredible powers, unprecedented mutations, time-loops and vast intergalactic intelligences--and the deeper influences of mythology and religion that these in turn drew from; the wildly creative work that followed caught the imaginations of millions. Moving deftly from Cold War science and Fredric Wertham's anticomics crusade to gnostic revelation and alien abduction, Kripal spins out a hidden history of American culture, rich with mythical themes and shot through with an awareness that there are other realities far beyond our everyday understanding."--Jacket.

The Kiss of Death

Jott is derived from Just One of Those Things, meaning things that fall on the floor and are never seen again, or were placed on a table for ready access but were next seen a few weeks later in a box of corks inside a drawer in a trunk, or which are not where you left them but unaccountably re-appear, on top of something you have just placed there.

Time Loops

Semiotic theory, which has restricted its focus largely to human forms of significations, is transformed by Robert S. Corrington into a semiotics of nature itself. Corrington situates the divide between "nature naturing" and "nature natured" within the contest of

classical American pragmatism and postmodern psychoanalysis. At the heart of this new metaphysics is an insistence that all signs participate in larger orders of meaning that are natural and religious. Meanings embodied in nature point beyond nature to the mystery inherent in positioned codes and signs.

New Foundation in the Sciences

In this groundbreaking book, bestselling author Theresa Cheung joins forces with cognitive neuroscientist Julia Mossbridge, PhD, Director of the Innovation Lab at The Institute of Noetic Sciences (IONS). Together they reveal revolutionary new

research showing that sensing the future is possible, they also provide practical tools and techniques you can use to develop your own powers of precognition. Precognition is the scientific name for the knowledge or perception of the future, obtained through extrasensory means. Often called 'premonition', precognition is the most frequently reported of all extrasensory perception (ESP) experiences, occurring most often in dreams. It may also occur spontaneously in waking visions, auditory hallucinations, flashing thoughts entering the mind, the sense of "knowing" and physiological changes. Combining science and practice, Theresa and Dr Julia unravel the mystery of precognition. The book will cover:

- What precognition is and the different types, clearly explaining the cutting-edge science, including what is known and what is still a mystery
- The most common premonitions that people experience and why, including examples from around the world
- Experimental tools to help you cultivate precognition experiences to help get useful information for your life
- Case studies included throughout, with supporting scientific evidence offered alongside to provide validation and explanation
- Personal experiences of the authors, detailing how premonition has shaped their lives and interviews with leading scientists and experts in the field

Tim Binding lived in Ilkley, Yorkshire, until he was seven. The place shaped his imagination and has haunted him ever since. On Ilkley Moor is an

Free Reading Time Loops Precognition Retrocausation And The Unconscious

imaginative history of a great town, a series of explorations partly factual, partly intuitive and partly personal. It is the tale of Victorian optimism - of faith in hydropathy, in manufacturing, in the railways. It is also an examination of Ilkley's place on the faultline between the two great forces which have informed English life and culture- its rural heritage, and the industrial revolution. It is a book about the north, about industry, commerce and medicine, and, above all, it is one small story of the England of the fifties, and the lost dreams of that era. Neither a travel nor a history book, this is a moving return home to the place that made the writer what he is.

Are language and consciousness co-evolving? Can psychedelic experience cast light on this topic? In the Western world, we stand at the dawn of the psychedelic age with advances in neuroscience; a proliferation of new psychoactive substances, both legal and illegal; the anthropology of ayahuasca use; and new discoveries in ethnobotany. From scientific papers to the individual trip reports on the Vaults of Erowid and the life work of Terence McKenna, Alexander and Ann Shulgin, and Stanislav Grof, we are converging on new knowledge of the mind and how to shift its functioning for therapeutic, spiritual,

Free Reading Time Loops Precognition Retrocausation And The Unconscious

problem-solving, artistic and/or recreational purposes. In our culture, psychonautics, the practices of individuals and small groups using techniques such as meditation, shamanic ritual, ecstatic dance and substances such as LSD and psilocybin for personal exploration, is a field of action and thought in its infancy. The use of psychonautic practice as a site of research and a method of knowledge production is central to this work, the first in-depth book focusing on psychedelics, consciousness, and language. Xenolinguistics documents the author's eleven-year adventure of psychonautic exploration and scholarly research; her original intent was to understand a symbolic language system, Glide, she acquired in an altered state of consciousness. What began as a deeply personal search, led to the discovery of others, dubbed xenolinguists, with their own unique linguistic objects and ideas about language from the psychedelic sphere. The search expanded, sifting through fields of knowledge such as anthropology and neurophenomenology to build maps and models to contextualize these experiences. The book presents a collection of these linguistic artifacts, from glossolalia to alien scripts, washed ashore like messages in bottles, signals from Psyche and the alien Others who populate her hyperdimensional landscapes. With an entire chapter dedicated to Terence and Dennis McKenna and sections dedicated to numerous other xenolinguists, this book will appeal to those interested in language/linguistics and the benefits of psychedelic self-exploration, and to readers of science fiction.

An Experiment With Time

Outlining the scientific evidence behind psi research, *Dark Cognition* expertly reveals that such anomalous phenomena clearly exist, highlighting that the prevailing view of consciousness, purely as a phenomenon of the brain, fails to account for the empirical findings. David Vernon provides essential coverage of information and evidence for a variety of anomalous psi phenomena, calling for a paradigm shift in how we view consciousness: from seeing it as something solely reliant on the brain to something that is enigmatic, fundamental and all pervasive. The book examines the nature of psi research showing that, despite claims to the contrary, it is clearly a

scientific endeavour. It explores evidence from telepathy and scopaesthesia, clairvoyance and remote viewing, precognition, psychokinesis, fields of consciousness, energy healing, out of body experiences, near-death experiences and post death phenomena, showing that not only do these phenomena exist, but that they have significant implications for our understanding of consciousness. Featuring discussion on scientific research methods, reflections on the fields of dark cognition and end-of-chapter questions that encourage critical thinking, this book is an essential text for those interested in parapsychology, consciousness and cognitive psychology.

The God Helmet Experiments is about the research which led to a technology that created a wide range of religious, mystic, and spiritual experiences in the laboratory. These included some visions of god, out of body experiences, waking dreams, apparitions, and the feeling that there is someone standing behind you when no one is there. It's even elicited Near-Death Experience phenomena. Used in other ways, the God Helmet has also created paranormal experiences, including ghostly visions. There were even a few experiments successfully applying the God Helmet for depression. The God Helmet was developed by two scientists at Laurentian University's behavioral neurosciences program, Stan Koren, and Dr. Michael Persinger, who was the director of the research group until he passed away in 2017. The editor took some of

Free Reading Time Loops Precognition Retrocausation And The Unconscious

Dr. Michael Persinger's difficult to read scientific papers about the God Helmet, and rewrote them to make them easier to read. This book is designed to help you understand the God Helmet, the brain's role in religious and mystic experiences, and even presents some material related to the debates and misunderstandings in this area of brain science. The God Helmet Experiments is a new kind of science book, letting the reader see the actual research. It's still a work of science, and still calls for some careful reading, though it's very much easier to read and understand than the original scientific journal articles. Dr. Michael Persinger was Todd Murphy's (this book's editor) mentor for 23 years, and they even published a few papers together. Not only can The God Helmet Experiments help you to understand the how the brain contributes to spiritual experiences, but it will also let you see the other exciting possibilities in this fascinating technology (low intensity complex magnetic signal stimulation). The book has three sections. The first is dedicated to some of Dr. Persinger's longer review and summary articles, four in all. The second is a series of experiments using the God Helmet, recounting the experiments, one by one. The third is a response to Persinger's critics and their (unfounded) criticism. Dr. Michael Persinger published over 500 articles in scientific journals during his career, and this volume only scratches the surface. Nevertheless, this collection of simplified papers by Dr. Persinger includes some of the most important "review" articles, where he summarizes his work. One day, mysticism and mystic experience could be available to every human being through this technology, or a future version of it that no one can

now imagine. There may be a few errors and typos in this book, and we ask the reader to be understanding about them. Let the author know, and they'll be fixed in a future revision. Thank you.

Quantum Physics, Retrocausation, PreCognition, Entanglement, Consciousness, Mental Time Travel

The experience of meaningful coincidences is universal. They are reported by people of every culture, every belief system, and every time period. Synchronicity examines the evidence for the human influence on the meaningfulness of events, and the way the modern computational model of the mind predicts how we create meaning. It demonstrates that these events, based on the activity of the mind, are caused by the person who perceives them. In this fascinating work, you will: Learn to use your amazing ability to create synchronistic events Discover how your mind creates the reality you experience Unlock your brain's vast resources of connectivity and creativity Change from living as a separate being to living as a part of the unified whole Synchronicity will show you how you already create events around you, and make you a conscious co-creator of your reality. Dr. Surprise describes the miracles of your brain's processes, merging the worlds of modern physics and ancient mysticism to reveal abilities you have always possessed, but which were not fully understood—until now. Learn to make reality dance to the rhythms of your thoughts.

The Miracle Club

Reality Denied confronts conventional wisdom with events that, although quite real, seem to challenge the revered "laws of science," proving them to be wrong or incomplete. The thorny issues of life after death, mind over matter, UFOs, remote viewing, telepathic communications with animals, and more are all addressed from Col. John Alexander's firsthand perspective. Here physical and spiritual domains collide, providing glimpses of worlds beyond everyday reality. JOHN B. ALEXANDER, Ph.D., is a retired senior Army officer with decades of experience with a wide range of phenomena. Traveling to all eight continents, he has encountered events that defy common explanation. He has met with shamans in the Amazon, the Himalayas, the Andes, East and West Africa, and Northern Mongolia. In Tonga, he dived in open ocean with humpback whales, and was involved with telepathic experiments with wild dolphins in the Bahamas. A psychic adventurer, he practiced psychokinetic metal bending, fire walking, and caused a white crow to fly for the National Academy of Sciences. A founding board member of IRVA, he is a past-president of IANDES, and former SSE councilor. Straddling two worlds, he is also retired from Los Alamos National Laboratory, and served on studies with the National Research Council, the Army Science Board, the Council on Foreign Relations, NATO, and was a senior fellow of a DoD university. Dr. Elisabeth Kübler-Ross headed his doctoral committee. His website is at johnbalexander.com.

Anomalous Cognition

It is widely known among the Frontiers of physics, that “sweeping under the rug” practice has been

quite the norm rather than exception. In other words, the leading paradigms have strong tendency to be hailed as the only game in town.

Mutants and Mystics

From the sands of Alexandria via the Renaissance palaces of the Medicis, to our own times, this spiritual adventure story traces the profound influence of Hermes Trismegistus -- the 'thrice-great one', as he was often called -- on the western mind. For centuries his name ranked among the most illustrious of the ancient world. Considered by some a contemporary of Moses and a forerunner of Christ, this almost mythical figure arose in fourth century BC Alexandria, from a fusion of the Egyptian god Thoth and the Greek god Hermes. Master of magic, writing, science, and philosophy, Hermes was thought to have walked with gods and be the source of the divine wisdom granted to man at the dawn of time. Gary Lachman has written many books exploring ancient traditions for the modern mind. In *The Quest for Hermes Trismegistus*, he brings to life the mysterious character of this great spiritual guide, exposing the many theories and stories surrounding him, and revitalizing his teachings for the modern world. Through centuries of wars, conquests and religious persecutions, the fragile pages of the teachings of Hermes Trismegistus have still survived. This is a book for all thinkers and enquirers who want to recover that lost knowledge and awaken a shift in human consciousness.

On Ilkley Moor

Have you ever had your car keys or television remote control inexplicably vanish from under your nose, only to reappear months later in another part of the house for no evident reason? Most would dismiss it as absent-mindedness, with perhaps a joking remark about paranormal activity. Yet remarkable circumstances surrounding many such accounts suggest that the mysterious disappearance of objects could be more than "just one of those things." Examining a large selection of fascinating narratives, this book reviews the "disappearing object phenomenon" (DOP) from a scientific standpoint. Both skeptical and supportive perspectives on DOP are considered, leading to the conclusion that disappearing, appearing and reappearing objects are indicators of a controversial take on the nature of reality.

The Multidimensional Human

In 1972, American astronomer and ufologist J. Allen Hynek first coined the term "close encounter." He also identified three types of close encounters with UFOs. Since then, several more types of encounters have been proposed. A close encounter of the fourth kind is an alien abduction. A closer encounter of the fifth kind is voluntary, bilateral contact with an alien species. We are no longer just looking at strange flying objects in the skies; now we are beginning to interact with the actual pilots, crew, and passengers! Do aliens exist? In 2013, one poll showed that nearly

half of all Americans (48 percent) believe UFOs may be a sign of extraterrestrial visitation; another found that 10 percent of Americans claim to have actually witnessed an actual UFO; and yet another showed that 2.9 million Americans believe they had actually been abducted by aliens. If aliens exist and are visiting us, we need to talk! Who will speak to them on behalf of planet Earth? Who can translate their intentions—good or evil—toward the human race? How can we learn about their advanced technologies? Can aliens speak human languages? These and even more fascinating questions are all addressed in *How to Talk to an Alien*.
