Language education is a highly contested arena within any nation and one that arouses an array of sentiments and identity conflicts. What languages, or what varieties of a language, are to be taught and learned, and how? By whom, for whom, for what purposes and in what contexts? Such questions concern not only policy makers but also teachers, parents, students, as well as businesspeople, politicians, and other social actors. For Japan, a nation state with ideologies of national identity strongly tied to language, these issues have long been of particular concern. This volume presents the cacophony of voices in the field of language education in contemporary Japan, with its focus on English language education. It explores the complex and intricate relationships between the "local" and the "global," and more specifically the links between the levels of policy, educational institutions, classrooms, and the individual. In the much-contested field of foreign language teaching in Japan, this book takes the reader directly to the places that really matter. With the help of expert guides in the fields of anthropology, sociology and linguistics, we are invited to join a vital discussion about the potentially revolutionary implications of the Japanese government's policy of teaching Japanese citizens to not only passively engage with written English texts but to actually use English as a means of global communication." - Robert Aspinall, PhD (Oxford), Professor, Faculty of Economics, Department of Social Systems, Shiga University, Japan This insightful book about language education involves different disciplines using ethnographic methods. Both 'native' and 'non-native' speakers of Japanese (or English) collaboratively examine two different types of qualitative approaches in Japan - the positivistic and the processual. This is a must-have book for researchers and educators of language who are interested in not only Japan but also language education generally." - Shinji Sato, PhD (Columbia), Director of the Japanese Language Program, Department of East Asian Studies, Princeton University, USA.

DEVELOPING SKILLS FOR THE TOEFL IBT: LISTENING (SECOND EDITION) (MP3 CD

Second Language Educational Experiences for Adult Learners provides an up-to-date review of the theory and practice of adult second language education. The primary objective is to introduce core ideas that should inform the design, development, and delivery of language learning experiences that take the typical forms of materials, courses, teaching, and assessment. Divided into three sections, the book first addresses what we know about adult second language acquisition and how individuals may acquire languages differently from each other. In the second section, key educational design elements—from pedagogical methods to curriculum to assessment—are then introduced from the perspective of research-based understandings about effective practices. Rounding out the volume is an overview of critical issues for language educational innovation, including supporting teachers, localizing materials and instruction, evaluating and improving education, and working with technology. Each chapter concludes with a set of recommended "design principles" that should guide readers toward high-quality, valuable, and empirically supported language educational experiences. This volume will be of interest to researchers and students investigating instructed language learning, designers creating useful language learning materials, and language teaching innovators seeking to improve outcomes in diverse instructional settings around the world.
