Clinical Reproductive Science

The U.S. information technology (IT) research and development (R&D) ecosystem was the envy of the world in 1995. However, this position of leadership is not a birthright, and it is now under pressure. In recent years, the rapid globalization of markets, labor pools, and capital flows have encouraged many strong national competitors. During the same period, national policies have not sufficiently buttressed the ecosystem, or have generated side effects that have reduced its effectiveness. As a result, the U.S. position in IT leadership today has materially eroded compared with that of prior decades, and the nation risks ceding IT leadership to other nations within a generation. Assessing the Impacts of Changes in the Information Technology R&D Ecosystem calls for a recommitment to providing the resources needed to fuel U.S. IT innovation, to removing important roadblocks that reduce the ecosystem's effectiveness in generating innovation and the fruits of innovation, and to becoming a lead innovator and user of IT. The book examines these issues and makes recommendations to strengthen the U.S. IT R&D ecosystem.

Gaining knowledge from informational texts is an essential academic skill. Yet for too many English Learners, this skill is not developed sufficiently and as they move from elementary into middle school, the reading gap becomes a knowledge gap. This doesn't have to happen, researcher Ana Taboada Barber explains, if we support EL's reading of informational texts by pairing motivation practices with explicit reading comprehension instruction. Taboada Barber shows us that "When we make motivation part of reading instruction, we show ELs that education is about identity and agency; we acknowledge who they are right now and invite them to grow through and by reading. The comprehension strategies and motivational practices discussed in this book help us identify tools to use with informational texts that foster curiosity rather than frustration." In *Reading to Learn for ELs*, Taboada Barber provides models of her instructional framework for reading informational texts so that reading teachers, content-area teachers, and ESL teachers alike can take on the work of teaching English Learners how to succeed and gain knowledge through reading informational texts.

Each and every organization needs to develop a good strategy for public affairs. Public affairs have received such kind of importance in today's world because no organization can survive in isolation. Every institution requires other institutions as well as the public that act as the customer, the decision-maker as well as the employees that can make or break the image of an organization. With the advent of technology, this task has become easier for managers. The information could be disseminated at a very low cost with the use of mass media and socializing websites. Creating a good image for an institution has become relatively much easier, but this comes with the negative fact that the dissolution of the image has also become an easy task. Public affairs have been increasingly given importance in the corporate world as increased competition has resulted in excess marketing and advertising campaigns that are used to create a Goodwill for the company. There are various tools under public affairs that are used by various organizations in order to fulfill their objectives and goals in the long run.
