Beginning with the overview of the field by Stig Johansson, an honorary member of the JAECS, the present volume shows the state-of-art in English corpus studies in Japan and demonstrates the creative uses of corpora in a wide range of research topics from studies drawing on large-scale general corpora, such as British National Corpus and the Bank of English, to studies based on more specific, historical, literary, learner and parallel corpora. The papers incorporated in this anthology are grouped into five sections: 1) Overview of corpus-based studies, 2) Corpus-based studies of contemporary English, 3) Historical and diachronic studies of English, 4) Corpus-based studies in English literature, 5) Corpus and English language teaching.
