Style is a distinctive manner of expression, in writing or speech. The word evolved from Latin *stilus*, an instrument for writing, marking, or incising, such as something used by the ancients in writing on clay or waxed tablets. It is the way in which something is said or done, as distinguished from its substance. Style is also a convention with respect to spelling, punctuation, capitalization, and typographic arrangement and display followed in writing or printing. *Scientific Style in English* helps students with the reading and writing of scientific and technical texts in English, with a particular focus on style, grammar and math. It can be used by students and professionals with basic or intermediate understanding of the English language. Technical topics discussed in the book include: - *Scientific Style in English* - *Mathematical Style in English* - *Technical Style* - *Stylistic Problems in English* - *How to write Theses and Dissertations*.

Jeffrey Freed and Laurie Parsons provide an effective method for helping children with Attention Deficit Disorder excel in a classroom setting. In straightforward language, this book explains how to use the innovative "Learning Styles Inventory" to test for a right-brained learning style; help an ADD child master spelling—and build confidence—by committing complicated words to visual memory; tap an ADD kid's amazing speed-reading abilities by stressing sight recognition and scanning rather than phonics; access the child's capacity to solve math problems of increasing, often astonishing complexity—without pen or paper; capitalize on the "writing and weaning" technique to help the child turn mental images into written words; and win over teachers and principals to the right-brained approach the ADD child thrives on. For parents who have longed to help their ADD child quickly and directly, Freed and Parsons's approach is nothing short of revolutionary.
